Innovation-Driven Entrepreneurial Ecosystems: Acceleration through Measurement and Policy

Professor Scott Stern

MIT and NBER
Orchard and foothills, Santa Clara Valley, Cal.
Far too often…

Well-intentioned approaches often end….in the Boulevard of Broken Dreams

Many regional efforts to accelerate through entrepreneurship fail to turn “ideas” into action, or fizzle out after an initial burst of energy and initiative.
How can we grow through accelerating innovation-driven entrepreneurial ecosystems?
MIT Regional Entrepreneurship Acceleration Program

System

Strategy

Stakeholders
Engaging more than 30 regions all over the world...
MIT IDE Ecosystem Framework

Cluster Based Comparative Advantage

Early-stage Capital Approaches
To align stakeholders and policymakers, need for shared understanding...

Can we develop meaningful and actionable (and real-time) metrics for IDE ecosystem assessments?
Measuring Entrepreneurial Quality: A Predictive Analytics Approach

Business Registrations

“Digital Signatures” of Growth Potential

Mapping Growth Outcomes onto “Digital Signatures” to estimate quality for all firms
### How do “Digital Signatures” of Start-Ups Predict Growth? (NB: Prediction NOT Casual)

<table>
<thead>
<tr>
<th>Has Short Name</th>
<th>248%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Firm Named after Founder</td>
<td>-70%</td>
</tr>
<tr>
<td>Corporation (Not Partnership or LLC)</td>
<td>405%</td>
</tr>
<tr>
<td>Trademark in First Year</td>
<td>501%</td>
</tr>
<tr>
<td>Patent and No Delaware Registration</td>
<td>3,534%</td>
</tr>
<tr>
<td>No Patent and Delaware Registration</td>
<td>4,470%</td>
</tr>
<tr>
<td>Both Patent and Delaware Reg.</td>
<td>19,640%</td>
</tr>
</tbody>
</table>

*State Controls Included, Sectoral Controls Included*
A New View of the Skew

10-Fold Test of Predictive Quality of Model*
Top 1% includes 51% of growth outcomes (range: [49%, 53%])
Top 5% includes 69% of growth outcomes (range: [65%, 72%])
Top 10% includes 75% of growth outcomes (range: [70%, 79%])

*10-Fold analysis of model separates the model into 10 random samples and then uses each of those sample as a test sample. We report the average value as well as minimum and maximum (range) of such.
# Entrepreneurial Quality Statistics

<table>
<thead>
<tr>
<th>Index</th>
<th>Description</th>
<th>Formula</th>
</tr>
</thead>
<tbody>
<tr>
<td>EQI</td>
<td>Entrepreneurial Quality Index (EQI)</td>
<td>Average estimated quality within a group of start-ups</td>
</tr>
<tr>
<td>RECPI</td>
<td>Regional Entrepreneurship Cohort Potential Index (RECPI)</td>
<td>The number of startups within a particular region expected to later achieve a growth outcome</td>
</tr>
<tr>
<td>REAI</td>
<td>Regional Entrepreneurship Acceleration Index (REAI)</td>
<td>Estimates the ability of an ecosystem to convert entrepreneurial potential into realized growth events.</td>
</tr>
</tbody>
</table>
Address-Level Visualization of Silicon Valley
RE CPI / GDP: The State of American Entrepreneurship Over Time

RE CPI / GDP shows a sharp raise in potential during the late 1990 followed by a drop (but NOT a collapse) in 2001 and more moderate increase after the Great Recession. Nowcasted Index tracks closely and documents “boom” since 2010.

Guzman and Stern (2016)
Decline in REAI indicates scaling failure for high-quality US start-ups over past 15 years…

Regional Ecosystem Acceleration Index (REAI) 1988-2012
Aggregate for 34 US States (83% of US GDP)
Entrepreneurial Quality Has a Strong Relationship to Economic Growth
Potential for Real-Time Policy Evaluation: The US EDA i6 Program

No changes in quantity

But an upward (noisy) swing upward in quality around i6 site
Potential for European Entrepreneurial Quality Statistics: The Case of Spain
Measurement as a Driver of Policy and Acceleration
The Challenge of Empowering Stakeholders for Systems-Level Change

IDE Ecosystem-led growth is different from traditional economic development approaches.

Collaboration across key stakeholders is crucial for collective impact and acceleration at the ecosystem level.
